**Seriously Strong Security**

Optiguard  
Anti Vandal Screens

Optiguard is a discreet, cost effective and low maintenance security barrier to protect windows against vandalism, breakage and opportunistic burglary. A finely perforated galvanised steel mesh secured by an aluminium frame, Optiguard provides a much more attractive solution than alternative means protecting vulnerable buildings and is popular with schools, universities, community centres, industrial units, offices and flats.

- **Quick payback** – once fitted most customers find Optiguard repays the investment many times over by reducing vandalism, breakage and burglary.
- **Unobtrusive appearance** – from a distance Optiguard resembles tinted glass but up close provides a strong visual and physical deterrent.
- **Perforations provide maximum vision and light** – whilst retaining the strength of the screen.
- **Cover strip protects fixings from attack** – unlike similar products the aluminium cover strip is firmly fixed and does not easily become detached.
- **Polyester powder coated** in a wide choice of colours – to give a long lasting finish and co-ordinate with décor.
- **Planning permission** is generally not required.

#### Product Information

	Optiguard
Construction	Galvanised steel
Thickness	1.5mm
Perforation diameter	4mm
Pitch	5mm
Visibility	60%

Sizes range from 100mm – 2500mm wide and 100mm – 1200mm high. For larger sizes a panel joining kit is required.

#### Bradbury Anti-Burglar Bars

Designed to a recognised insurance specification, Bradbury Anti-Burglar Bars are 20mm steel bars fixed to provide maximum protection and rotate to deter attack from tools such as hacksaws. The bars have no welded parts giving exceptional strength and are polyester powder coated for a long lasting finish suitable for internal and external use. A wide selection of colours are available.

#### Bradbury Security

Other products from Bradbury Security include CX Retractable Security Grilles, Steel Doors, Roller Shutters, Safes and Cages.
