

SPECIFICATION SHEET

# Bar Grilles & Hinged Bar Gates

The SGG Bar Grille is manufactured for use as a fixed security grille, for use in medium to high security applications.

Manufactured from high quality steel and powder coated in white as standard, or to your specific colour scheme as an option.

Its physical appearance is a good psychological deterrent. Our ISO9001 accreditation for quality management of production will provide you with peace of mind knowing that SGG manufacture to the highest specification.

Popular in many applications, generally on the outside of windows or as a hinged bar gate for entrance doors. Used in domestic, commercial and industrial applications.

## Available in the following specifications:

- 19mm solid round bar for insurance specification
- 16mm solid round bar for standard applications
- 12mm or 16mm solid square bar - which can provide a brick effect
- 12mm x 5mm flat steel - to match existing window designs

## PRODUCT CHECK LIST

- ✓ **Exceptionally strong steel barrier**
- ✓ **Excellent vision from inside and out**
- ✓ **Custom built to suit any opening**
- ✓ **Any colour available as option**
- ✓ **Choice of material and style**
- ✓ **Manufactured to the highest standard - ISO 9001 accredited**

## HOW TO MEASURE

Bar Grilles are usually fitted to the external face of the window, so are manufactured larger than the window size.

Please provide us with the brickwork opening sizes for width and height and we will do the rest.
