Retractable Security Gates & Removable Bars

SECEUROGUARD™

1000 Retractable Security Gates

SECEUROBAR™

Removable Window Bars

AN EFFECTIVE BARRIER AND DETERRENT TO CRIME

The SeceuroGuard Retractable Security Gate system is a stylish solution for protecting windows and doors. Available in two versions, SeceuroGuard 1001 - tested and approved to LPS1175 Security Rating Classification 1 (See pages 3/4) and SeceuroGuard 1000 - the standard design. Both offer highly effective protection and progressively enhanced levels of security.

The award-winning SeceuroBar system features anti-cut steel bars which are securely locked into position to protect vulnerable window openings, but can be released from the inside to allow total vision or maintenance of windows.

Suitable for installation in a horizontal or vertical format, SeceuroBar is finished to a high standard and delivers security which is quick and easy to install, yet highly effective in a range of locations.

A higher security fixed bar system is also available for locations where removal is not a requirement. Alternatively SeceuroGuard can be manufactured in a non retractable format.

SeceuroGuard 1000, retail security, maximum vision.

SECEUROGUARD 1000

Elegant good looks with a heart of steel - the SeceuroGuard Retractable Security Gate System combines a classic appearance with the highest level of protection, ideal for your home or workplace.

Designed to keep intruders out while letting maximum light in, they are perfect for patio doors and French windows and any other vulnerable ground floor doors or windows.

When not in use these retractable gates are surprisingly unobtrusive. Fitted to the door or window surround, they can disappear neatly behind curtains and a pelmet can be used to conceal the top track.

SeceuroGuard retractable gates are exceptionally safe and easy to handle with a smooth, quiet operation. They hang from a top track with a guide track at the base which can be supplied as an optional extra to quickly fold away when not required.

SeceuroGuard 1000, exceptional light levels.

The opportunity to fold up the bottom guide track from the opening (an optional extra) leaves domestic patio doors, doorways and shop entrances free from obstruction.

Because they are fully retractable, each sash can be stacked neatly in the open position away from the door or window openings when not required, and may be hinged to swing away from the opening at 90°, 180° and up to 270° to provide a completely clear opening as an optional extra.

Installed inside a shop window, retractable gates deliver an exceptionally strong yet aesthetically appealing barrier against intruders, which allows merchandise to be displayed safely, 24 hours a day. They can also be effectively positioned at the rear of the window display, creating an attractive backdrop whilst protecting the shop's interior.

SeceuroBar see-through security.

SeceuroBar designed for easy removal.

IN DETAIL

SECEURO BAR

Anti-cut steel tube 19mm diameter with angled profile locating and locking sections Suitable for internal installation.

SECEUROGUARD 1000

1000

High grade steel construction in cross lattice as standard and 'S' lattice as an option.

'S' lattice option.

SeceuroGuard 1000, shown here in a domestic setting - now you see it...

SECEUROGUARD 1000

- Exceptionally strong security barrier
- Galvanised for corrosion resistance and powder coated
- Fully retractable system
- Excellent through vision when locked
- Multi point locking from a single key
- Smooth running carrier system
- Custom built for any opening
- Quick and easy to use
- Can be fitted with a locking post at both ends to provide maximum flexibility of operation
- Where access is not required, a fixed sash option is available
- An unlimited width can be accommodated in sections

The bottom track is available folding, to lift clear of the opening, important for unhindered access when used in doorways or french windows.

As an optional extra, sashes can hinge away for unobstructed vision.

SWS UK is a leading manufacturer of physical security products and has developed the comprehensive Seceuro range of shutters, see-through shutters, retractable gates and removable bars to offer more effective protection for businesses and homes.

Established in 1985 and with a wealth of experience, SWS UK is based in modern, purpose-built premises located near Lancaster and employs more than 200 people.

A cornerstone of SWS's reputation is its national network of specialist distributors. Working in partnership to promote, supply, install and support, distributors provide a trusted, experienced and local source for the SWS product range.

SWS UK is registered to ISO 9002 by the Loss Prevention Certification Board and operates a programme of continuous improvement to its products. The company continues to invest in research and development with the consistent aim of producing physical security products which offer uncompromising protection designed to meet the demands of the modern lifestyle and workplace.
